WORK EXPERIENCE

Zimple Media - UX/UI Designer

2021 - 2026, Digital Platform, Bangkok

- Led the end-to-end redesign of Propertyhub and Renthub (web + mobile apps) and designed all other company products as the sole designer — owning research, user flows, UI, prototyping, and hand-off.
- Designed a 4-step GA4 Funnel Exploration to benchmark the redesigned project pages against the legacy design over a comparable period. Identified a consent-gate skew at the entry step, then focused analysis on the mid-to-bottom funnel, where the new design drove a higher share of users to the contact-agent goal — the platform's primary conversion action (from 1.6% to 3.0% of sessions).
- Owned every design decision from business requirement through research, ideation, testing, and hand-off — partnering with engineering to find the best solution achievable within technical constraints.

Bulk One Group - Junior UX/UI Designer

2018 - 2021, Startup, Bangkok

- Designed end-to-end for Bulk's core construction-tech products and adapted them for client-specific needs, working within a structured Scrum process (Product Owner → PM → Scrum Master) and facilitating sprint updates across the design team.
- Ran field research on active construction sites and at client offices — gathering requirements, observing real users during training programs, and feeding on-site findings back into design iterations.
- Won 1st place in a company-wide hackathon with AWS, designing a facial-recognition concept for construction use cases from on-site insights — later built into a real product, with a study trip to Singapore as the prize.

EDUCATION

Silpakorn University

B.Sc. Information & Communication Technology

Major in Web & Interactive Media Design

SKILLS

UX : Research, User Flow, Wireframing, Prototyping, Usability Testing

UI : Visual Design, User Interface Design, Design System, Responsive & Mobile UI

Tools : Figma, Photoshop, Illustrator

AI-Assisted Workflow : AI Design Workflow, AI Prototyping
